Loctite® SF 7850 "New" Formulation MSDS

Loctite® SF 7850 hand cleaner was reformulated in the early part of 2014 and was given a new Real Substance Number - the level of d-limonene was reduced.

As there is a new regulation in place (since July 11th 2013), we have had to discontinue sales of the older version of Loctite® 7850 (Real Substance Number 173739) as we were not compliant with these regulations.

The MSDSs were archived, although it may still be available on the internet. We should not be supporting this product any longer as it does not comply with current EU regulations The new formula (RSN 448314) now complies with regulatory requirements and supply should have been restored.

However as Loctite® SF 7850 is a hand cleaner and is governed by the Cosmetics Directive and not the Dangerous Preparations Directive, hence it does not require this classification and the label must be in accordance with the Cosmetics Directive.
